Objective:

Computer Science and Engineering (Data Science) graduate seeking an opportunity to apply my knowledge and practical experience in data analysis, database development, and software development while contributing to innovative, data-driven solutions and growing professionally.

Education:

Bachelor's degree in **Computer Science and Engineering (Data Science)**, University of Hafr Al-Batin

✓ Graduation: 2026

Experiences:

Information Systems & Database Development Trainee at Administrative & Technical Training Department, King Fahad Medical City in Riyadh, Jun 2025 - Dec 2025

- Designed and managed **SQL Server** databases, wrote and optimized **30+** SQL queries to improve data retrieval performance.
- Built **2** internal web applications — Smart Meetings and Task Manager — using **ASP.NET Core MVC** and Visual Studio, streamlining manual scheduling processes.
- Integrated **SQL Server** with live web applications via full **CRUD** operations, supporting stable data flow across **3** core modules
- Conducted testing and debugging to improve application reliability before deployment.

Projects:

- AI-Powered Clinical Decision Support and Patient Monitoring System:** Developed a full healthcare platform for ICU patient monitoring using **Python**, **Pandas**, **Scikit-learn**, and **Prophet**. Built ML classification models to assess patient risk levels and a time-series forecasting model to predict hospital admissions. Designed interactive **Streamlit** and **Matplotlib** dashboards to visualize **KPIs**, hospital analytics, and real-time patient data — supporting resource planning for simulated ward of **50+** patients.

Professional Development:

Courses & Certificates:

- Python for Data Science, AI & Development, IBM, Feb 2025
- Certified Excel Course, Doroob Platform, Feb 2025
- Data Analysis and Visualization using Tableau, Tuwaiq Academy, Jan 2025

Skills:

Hard skills:

- Data Analysis and Visualization (Power BI, Tableau, Matplotlib, Streamlit)
- SQL Query Writing and Optimization (SQL Server, CRUD Operations)
- Python for Data Analysis (Pandas, Scikit-learn, Prophet)
- Web Application Development (ASP.NET Core MVC)
- Machine Learning and Predictive Modeling

- ETL Processes and Relational Database Management
- KPI Monitoring and Dashboard Development

Soft skills:

- Analytical Thinking
- Problem Solving
- Stakeholder Communication
- Attention to Detail
- Time Management

Languages:

- Arabic
- English
